WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

To reduce the risk of fire, do not cover the ventilation opening of the apparatus with newspapers, tablecloths, curtains, etc. Do not place the naked flame sources such as lighted candles on the apparatus.

To reduce the risk of fire or electric shock, do not expose this apparatus to dripping or splashing, and do not place objects filled with liquids, such as vases, on the apparatus.

As the main plug is used to disconnect the unit from the mains, connect the unit to an easily accessible AC outlet. Should you notice an abnormality in the unit, disconnect the main plug from the AC outlet immediately.

The unit is not disconnected from the mains as long as it is connected to the AC outlet, even if the unit itself has been turned off.

Do not install the appliance in a confined space, such as a bookcase or built-in cabinet.

Do not expose batteries or apparatus with battery-installed to excessive heat such as sunshine, fire or the like.

The nameplate is located on the bottom exterior of the main unit (ATS-SW10Ti).

Notice for the customers in the U.S.A.

This symbol is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

This symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

The following indications are located on the bottom exterior of the main unit (ATS-SW10Ti).

Owner's Record

The model and serial numbers of the main unit are located on the bottom of the main unit, and those of the subwoofer are located at the rear of the subwoofer. Record these numbers in the space provided below. Refer to them whenever you call upon your Sony dealer regarding this product.

Model No. _____
Serial No. _____

Important Safety Instructions

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments/accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

The following FCC statement applies only to the version of this model manufactured for sale in the U.S.A. Other versions may not comply with FCC technical regulations.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

For the wireless transceiver (EZW-RT10A)

This equipment must not be co-located or operated in conjunction with any other antenna or transmitter.

This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65.

This equipment should be installed and operated with at least 20cm and more between the radiator and person's body (excluding extremities: hands, wrists, feet and ankles).

Notice for the customers in Canada

For the wireless transceiver (EZW-RT10A)

This Class B digital apparatus complies with Canadian ICES-003.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This equipment complies with IC radiation exposure limits set forth for uncontrolled equipment and meets the RSS-102 of the IC radio frequency (RF) Exposure rules.

This equipment should be installed and operated with at least 20 cm and more between the radiator and person's body (excluding extremities: hands, wrists, feet and ankles).

- All other trademarks and registered trademarks are of their respective holders. In this manual, ™ and ® marks are not specified.

Features

AIR-SW10Ti is an “S-AIR” compatible packaged product that consists of one S-AIR main unit and one subwoofer. You can enjoy high quality sound by connecting the subwoofer wirelessly. The subwoofer can be used only with this main unit.

In addition, connecting the S-AIR main unit (hereafter called “main unit”) to optional S-AIR sub units (hereafter called “sub units”) using “S-AIR” technology, you can use each unit in a remote location.

For example, you can install optional sub units, one in a study room and the other in a bedroom, and install the system in the living room. You can then listen to music from the system located in the living room by controlling the sub units.

Up to 10 optional sub units can be connected to a main unit.

S-AIR (Sony Audio Interactive Radio frequency)
Recent times have seen the rapid spread of DVD media, Digital Broadcasting, and other high-quality media.
To ensure that the subtle nuances of these high-quality media are transmitted with no deterioration, Sony has developed a technology called “S-AIR” for the radio transmission of digital audio signals with no compression, and has incorporated this technology into the EZW-RT10A.
This technology transfers digital audio signals with no compression using the 2.4 GHz band range of ISM band (Industrial, Scientific, and Medical band), such as wireless LANs and Bluetooth applications.

Main unit

(ATS-SW10Ti / Wireless Audio Transmitter)

* Touch sensitive buttons
Operation using the touch sensitive button that beeps.

Subwoofer

(SA-WA10R / Wireless Speaker System)

The subwoofer can be placed with the speaker side up.

Remote (RM-ANU066)

This manual mainly explains operations using the remote, but the same operations can also be performed using the buttons on the unit having the same or similar names.

To use the remote

Slide and remove the battery compartment lid, and insert the two supplied R03 (size AAA) batteries. ● side first, matching the polarities shown below.

Notes on using the remote

- With normal use, the batteries should last for about six months.
- Do not mix an old battery with a new one or mix different types of batteries.
- If you do not intend to use the remote for a long period of time, remove the batteries to avoid damage from battery leakage and corrosion.

Getting Started

Hooking up the system

Main unit

Subwoofer

- A) FM lead antenna (extend horizontally)
- B) White side for North American model
- C) Brown side for other models
- D) Wireless transceiver (EZW-RT10A)

Wireless transceiver

Insert the supplied wireless transceiver (EZW-RT10A) securely into the EZW-RT10A slot on the rear panel of main unit and the subwoofer. Check the orientation of the ▼ mark when inserting the supplied wireless transceivers (EZW-RT10A). Failure to do so may result in damage to the main unit and subwoofer.

Notes

- Make sure to turn off the main unit and the subwoofer when inserting or removing the supplied wireless transceivers (EZW-RT10A). Failure to do so may result in damage to the main unit and subwoofer.
- Do not touch the terminals of the supplied wireless transceivers (EZW-RT10A).
- Do not insert any device other than the supplied wireless transceivers (EZW-RT10A) into the EZW-RT10A slot.

FM antenna

Find a location and an orientation that provide good reception, and then set up the antenna. Keep the antenna away from the power cord to avoid picking up noise.

Power

Connect the power cord to a wall socket.

To use the iPod/iPhone

Insert a Universal Dock Adapter into the Dock [4] before use. Use the supplied Universal Dock Adapter with the main unit for iPhone and iPhone 3G as follows. The adapter number is shown on the bottom of Dock Adapter.
– iPhone : ⑫
– iPhone 3G : ⑬
When you use other iPod models, use the adapter supplied with your iPod model, or purchase a compatible Dock Adapter from Apple Inc.

To set the clock

Use buttons on the remote to set the clock on the main unit.

- 1 Press I/⏻ [1] to turn on the main unit.
- 2 Select the clock set mode.
Press CLOCK/TIMER [16] to select the clock set mode. If “PLAY SET” flashes, press ◀/▶ [20] repeatedly to select “CLOCK,” and then press ENTER [12].
- 3 Set the time.
Press ◀/▶ [20] repeatedly to set the hour, then press ENTER [12]. Use the same procedure to set the minutes.
When you turn off the unit, the clock display appears in the display.

Note

The clock settings are lost when you disconnect the power cord or if a power failure occurs.

To adjust the volume

Press VOLUME +/- [8].

Establishing the S-AIR connection

You can easily establish the connection by setting the same S-AIR ID for the main unit and the subwoofer.

- 1 Check that the wireless transceivers are inserted securely in the main unit and the subwoofer.
- 2 Press I/⏻ [1] on the main unit and the subwoofer to turn them on.
- 3 Set the same S-AIR ID for the main unit and the subwoofer as follows:

Main unit

- ① Press SYSTEM MENU [18].
- ② Press ◀/▶ [20] repeatedly until “S-AIR” appears, then press ENTER [12].
- ③ Press ◀/▶ [20] repeatedly until “S-AIR ID” appears, then press ENTER [12].
- ④ Press ◀/▶ [20] repeatedly to select “A”~“B” or “C,” then press ENTER [12].

Subwoofer

Set the S-AIR ID selector [10] on the rear panel to the same S-AIR ID as the main unit.

Tip

The S-AIR ID is set at the factory to “A.”

- 4 Confirm the connection status.

Once connection between the main unit and the subwoofer is established, the S-AIR indicator [9] on the subwoofer lights up.

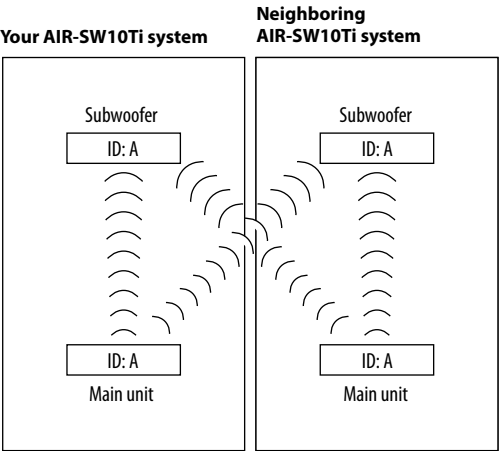

Tip
You can also connect up to 10 optional sub units to the main unit. In this case, set the S-AIR ID to the same ID as the main unit. For details on the S-AIR ID of the sub unit, refer to the Operating Instructions supplied with the sub unit.

Identifying the subwoofer with your main unit (Pairing operation)

It is easy to set the same S-AIR ID for the main unit and the subwoofer to establish the connection. However, if a neighbor has an AIR-SW10Ti system with the same S-AIR ID as your S-AIR main unit, the neighbor may be able to hear the audio transmitted from your main unit on the neighbor's subwoofer. Also, you may be able to hear the audio transmitted from your neighbor's main unit on your subwoofer. To prevent this, you can identify the subwoofer with your main unit by performing the pairing operation.

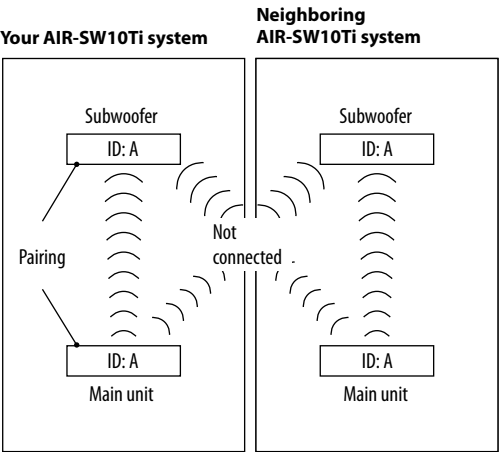

Before pairing

Connection is established by the S-AIR ID (example).

After pairing

Connection is established between the subwoofer and your main unit.

- 1 Place the main unit near the subwoofer.
- 2 Check that the power of the main unit and the subwoofer is turned on.
- 3 Check that the S-AIR ID of the main unit is the same as the S-AIR ID of the subwoofer.
- 4 Perform the pairing operation of the main unit and the subwoofer as follows:

Main unit

- ① Press SYSTEM MENU [18].
- ② Press ◀/▶ [20] repeatedly until “S-AIR” appears, then press ENTER [12].
- ③ Press ◀/▶ [20] repeatedly until “PAIRING” appears, then press ENTER [12]. “OK?” flashes.
- ④ Press ENTER [12] again. “PAIRING” flashes and the main unit is ready for pairing with the subwoofer.

Subwoofer

Press PAIRING [11] on the rear panel of the subwoofer using a pointed object.

When pairing is performed, “COMPLETE” is displayed on the main unit for 2 seconds and the PAIRING indicator [11] on the subwoofer lights up.

To cancel pairing

Change the S-AIR IDs of the main unit and the subwoofer to different S-AIR IDs.

To stop the pairing operation midway

It takes a few seconds to complete the pairing of the main unit and subwoofer after pressing PAIRING [11] on the rear panel of the subwoofer in step 4. You can undo the pairing setting before completing the pairing.

If you have done the pairing operation of only the main unit, repeat ① to ④ of step 4 again.

If you have done the pairing operation of both the main unit and subwoofer, repeat ① to ④ of step 4 and press PAIRING [11] on the rear panel of the subwoofer.

Tip

You can also pair the main unit with optional sub units. For details on turning on the pairing function, refer to the Operating Instructions supplied with the sub unit.

If the S-AIR connection is unstable

Since the S-AIR product uses radio waves that share the same frequency (2.4 GHz) as other wireless systems, such as wireless LAN or Bluetooth devices, interference or poor transmission may result if you use other wireless devices near the system.

In this case, the connection may be improved by changing the RF CHANGE (Radio Frequency Change) setting on the main unit.

- 1 Press SYSTEM MENU [18].
- 2 Press ◀/▶ [20] repeatedly until “S-AIR” appears, then press ENTER [12].
- 3 Press ◀/▶ [20] repeatedly until “RF CHANGE” appears, then press ENTER [12].
- 4 Press ◀/▶ [20] repeatedly to select the desired setting.
The default setting is underlined.

AUTO

Normally select this setting. The main unit changes the RF CHANGE setting to “ON” or “OFF” automatically.

ON

The main unit transmits sound by searching for the best channel for transmission.

OFF

The main unit transmits sound using a fixed channel for transmission. When you select this setting, select the S-AIR ID that provides the best connection.

- 5 Press ENTER [12] to exit the system menu.

Turning the subwoofer on/off in sync with the main unit

When the subwoofer is on or in power save mode, press I/⏻ [1] on the main unit to begin using the system. By pressing I/⏻ [1] on the main unit to turn it off, the subwoofer will enter power save mode. Each time you press I/⏻ [1] on the main unit, the subwoofer will be turned on/off in sync with the main unit.

You can check the power status of the subwoofer by the I/⏻ indicator [2] on the subwoofer.

Subwoofer status indication

I/⏻ indicator	Status
Green	Power on
Orange	Power save mode You can turn on the subwoofer by pressing I/⏻ [1] on the main unit.
Red	Standby mode You cannot turn on the subwoofer by pressing I/⏻ [1] on the main unit. To turn on the subwoofer, press I/⏻ [1] on the subwoofer.
